DETAILED ACTION

Response to Amendment

1. The amendment filed September 27, 2007 has been entered; no new claims have been entered.

Allowable Subject Matter

2. Claims 17-21 and 23-25 are allowed.
3. The following is an examiner's statement of reasons for allowance: A closely related art, Watanabe USPN 5,654,578, discloses a semiconductor light-receiving device comprising: a semiconductor substrate of a first conduction type; a buffer layer of the first conduction type that is formed on the semiconductor substrate and having a lower impurity concentration than the semiconductor substrate; a light absorption layer that is formed on the buffer layer; and a high-concentration semiconductor intermediate layer of the first conduction type that is interposed between the buffer layer and the light absorption layer having a higher impurity concentration than the buffer layer. However, independent claims 17 and 23 require the light absorption layer directly contacts the high concentration semiconductor intermediate layer. The above limitation in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to yield the device of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
